

HR POLICY — Engineering Hiring Policy

Purpose:

This policy defines general hiring principles for engineering roles and is intended for contextual guidance only.

Education Guidelines:

Candidates from non-computer-science backgrounds may be considered if they demonstrate strong practical programming experience and problem-solving ability.

Skill Expectations:

Mandatory technical skills listed in the job description must be clearly demonstrated in the candidate's resume. Skills not explicitly stated should not be assumed.

Experience Guidelines:

Hands-on experience and real-world project exposure are valued over purely academic knowledge.

Evaluation Principles:

- Decisions must be based only on documented qualifications
- No assumptions should be made beyond the provided resume
- Transparency and consistency in evaluation are required
